

# Blind Pew

## BAND STORY

" Mixing satirical lyrics with music that's oft-described as down and dirty rock n roll, Scottish four-piece Blind Pew have established themselves as one of the most promising bands on the Scottish music scene. Formed in Largs in 2003, Blind Pew typically rocked their way free of small town life. The four met at school and have been playing together ever since. For the most part now based in Glasgow, the bands prosaic beginnings have led to a musical career that's anything but generic."
