 melodic rock barrier..." - Fireworks
 Magazine Just what is Project-43?
 That's a pretty good question, with a
 pretty interesting answer. Project-43
 is a relatively new collaboration
 between musicians over the Internet.
 The members are located in five
 separate locations around the globe.
 Three are in the US (Arizona,
 Wisconsin & New York), one in
 Finland and one in Scotland. It really
 is a true Internet Band creating true
 Internet Rock. As strange as it may
 seem, none of them have ever met
 face to face. Thank goodness for the
 marvels of modern technology!! To
 date, Project-43 has created over
 thirty original Rock & Roll songs that
 have an amazing quality that would
 challenge even the best industry
 professionals to know that these
 people have never played in the
 same room together. The release of
 their debut CD, "Silence the Quiet" is
 sure to turn some heads and ears as
 the guys pump out ten of their newest
 songs. One thing that will be clear
 when listening, is the classic
 rock/metal influence. Project-43 takes
 pride in honoring their roots and

pride in honoring their roots and putting a classic vibe on to their modern music. From the first song, "Exit" all the way to the end with "Into the Black", you will be sure hear the influences and appreciate the modern take on them. This CD is remarkable in that it was produced in 5 separate locations around the globe without any of the members actually being in the same room. EVER. We think it's a sneak peak into the not so distant future. Or, as we like to say, Project-43: The Future of Classic Rock! "
