

Red I Clan

BAND STORY

"'RED i CLAN' is the brainchild of Sor (vox), a classically trained musician that studied classical guitar and composition in Europe. It grew from the need to make something new, yet still edgy. To accomplish this he enlisted the help of his friends, Drey (bass), Raul (guitar) and Alex (drums), all of whom are professional musicians. Rather than rehash old formulas, 'RED i CLAN' tries to bring some new 'noise' to the table, push the envelope, while still making music that is easy to get into. Taking the project out in Europe, where the band was originally formed, the boys discovered that audiences go ballistic for the beats and the fresh sound that 'RED i CLAN' delivers live. Next to the crunchy hard rocking sound, 'RED i CLAN' draws heavily from the classical and jungle/electronica genres and combines it all together into a jolted musical style that is all their own. Drum beats 'hopped up on steroids', tight crunchy guitars, sub-bass and synths are melted into infectious grooves that pulsate and make it hard for people to stand still. "
