BAND STORY

"The album "A Flight Into The Abyss" is currently published on itunes, Amazon, Napster and all download sites. The tracks have appeared on BBC Radio 1Xtra, BBC Radio 6 (Tom Robinson show) and on Original 106FM. I studied the contemporary saxophone & music production at the London Guildhall University, during a Music Technology degree. That's where I became a dance dj, getting my first residency in the students union. I have lways wanted to bridge ambient dance music with jazz. After producing a few tracks from the hits and misses, I was encouraged to release this album. You can also see me perform as a saxophonist with one of Hampshire' s busiest bands " The Cheese Doctors".

(www.thecheesedoctors.com). I also perform with a jazz quintet and " dep" (stand in) with many other professional bands. I have recorded with some of the industry' s top engineers and producers, in a range of genres from dance music to rock n' roll."
