## BAND STORY

"BIO This four piece original act has identified their own sound with a bleeding mixture of rock and roll bluegrass, americana, soul, and vocal styling just not available on the music scene today. Jim DeWitt/Songwriter - Is a wild visionary. Sometimes Dark, always mysterious, yet sensible and hooky. Not an easy combination to accomplish. Jeff Wilson/Songwriter - Our ace in the hole story teller. Great rhythms, "Real feel", Picnic, knee slappin love. You won't believe this guy is from Jersey. Joe Larsen - Accomplished solid groove player. Yeh, that's right put on the click. He has no fear. Joe has recently toured with Amphibian, and has also recorded and toured with multiple accomplished artists. Gary Szymanski - The "bring it together guy". Gary brings his versatile style to the unit. Playing everything from funk and blues to country licks. If you're looking for a hook he just may find it.
