

PsykNyne (sick-9)

BAND STORY

"PsykNyne (sick-9) Staying true to the bare boned, knuckle-scraping basis of rock and roll, this middle Georgia based Jager band has created a gritty, non-stop hard rock sound that drives music fans of all ages wild with sheer pleasure. Blending Danzig, Zakk Wylde and Disturbed, this quartet of "psyk-os" work hard and play hard, and their liveliness brightens every event. Singer Scott Selph commands all to move and groove with his overdrive vocals and beefy biker exterior, female drummer Misty Vaughn and bassist Jimmy Elvis Noles bang out turbo tom-tom drum beats, while "Big Willi" Hursey produces squelching harmonic guitar riffs and low end growling grooves in songs about outcasts of life, love and society. Since 2004, PsykNyne audiences from FL to Sturgis SD have always felt part of the shows, and the band feeds from the crowd's energy, whether it be 200 or 20,000, PsykNyne is ready to rock your world! PsykNyne is very pleased to offer "RIDE" (6/2007). 13 tracks that describe everyday situations with emotions high and low, ala the "good old days of rock" when a song with HOOKS stays in your mind and you just can't hear it enough - PsykNyne and producer Lance Hoskins (Goatfinger Studios) have created a soundtrack for life - the RIDE of your life !
